Subject: Environmental Database – Sustainability of Air Duct Products

Binnenklimaat Nederland hereby declares that the company **Kennemer Schagen Industries BV / Air Spiralo Group** meets the sustainability requirements for the environmental performance of its air duct products. This is demonstrated by the inclusion of a validated **Category 2 card** in the **National Environmental Database (NMD)**.

Binnenklimaat Nederland manages and maintains a set of product cards that provide insight into the environmental performance of ventilation and air treatment products. The Category 2 cards in the National Environmental Database are based on **representative environmental data** of product groups within the sector. For the air duct products of **Kennemer Schagen Industries BV / Air Spiralo Group**, this means that:

- The environmental performance has been **assessed and validated** in accordance with the guidelines of the **National Environmental Database**.
- The assessment was conducted based on **uniform methodologies** that align with the **Environmental Performance of Buildings and Civil Engineering Works (MPG) calculation method**.
- The products meet the requirements of the **Sustainable Building (DUBO) framework** and can be used in sustainability calculations for construction projects.

By utilizing the environmental cards provided by **Binnenklimaat Nederland, Kennemer Schagen Industries BV / Air Spiralo Group** contributes to **transparent and objectively substantiated** environmental performance for its air duct products. This supports **designers, builders, and clients** in making informed decisions regarding sustainability and circularity in the built environment.

Binnenklimaat Nederland fully supports this development and remains committed to **further sustainability improvements and standardization within the sector**. For more information on environmental product cards and assessment details, please contact **Binnenklimaat Nederland** or consult the **National Environmental Database**.

Kind regards,

Remi Hompe
Directeur Binnenklimaat Nederland
